

iCAP™

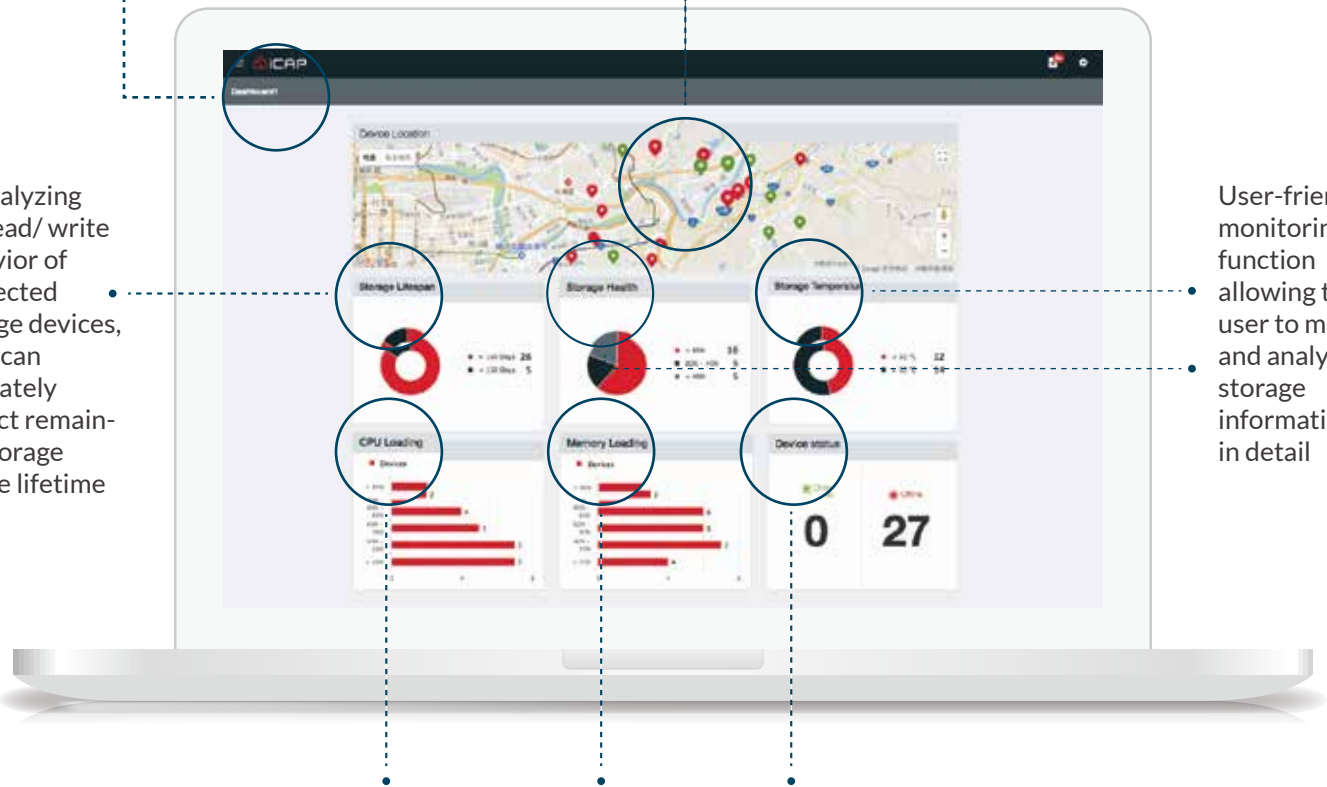

Innodisk Cloud Administration Platform
The Future of Cloud-Based Management

The web page dashboard enables the user to easily manage connected devices through supported browsers

Customizable widgets including gauges, Google Maps, and various tables presenting device data

By analyzing the read/write behavior of connected storage devices, iCAP can accurately predict remaining storage device lifetime

User-friendly monitoring function allowing the user to manage and analyze storage information in detail

Keep tabs on current CPU and Memory loading

Effectively monitor remote device status

iCAP Advantages

Windows

Linux

Wide Coverage

iCAP agent application supports devices running on both Windows and Linux

Flexible Deployment

Rapid deployment whether it is on the Cloud or On-premise

Easy Access

The browser-run dashboard enables the user to easily manage connected devices

Benefits

• Smart Management

The dashboard view and device grouping function makes management easy, intuitive and convenient

• Efficient Prediction

iCAP integrates with Innodisk's firmware algorithm to accurately predict remaining storage device lifetime and will alert the user by email of any changes

• Quick Maintenance

In the event of a system error or instability the remote recovery function can quickly revert to default working status
